About Us

DICEGAME is a decentralized Graphene-based platform that builds a fair and transparent ground for P2P games. We retrieve user's trust by wrapping all the game logic into the smart-contracts based on the blockchain. Graphene technology integrated into the DICEGAME allows to have low fees and high speed transactions. The platform provides the playground for the P2P game with up to 50% of winning odds. We decentralize everything in the DICEGAME platform: only white box algorithms, clear and user-friendly conditions of the games, fast and transparent transactions, no limitations on deposits and withdrawals.

Economy

The concept of the project is to conduct regular Bonus Tournaments (BT). Every new tournament or one-to-one game continuously contributes to the prize fund of the BT. The half of the fee charged by the platform goes to the common prize fund of the BT, which is distributed between all bonus tournaments. The first bonus tournament on the DICEGAME platform will have the prize fund of 5% from the all Dice tokens issued. There are no any investments required to participate in this BT.
